

planner

Prepare and plan your 3D inspection

Planner, is an innovative offline software designed to automate and optimize 3D inspection planning. It offers an intuitive interface to prepare your inspection plan, directly from your CAD models.

Planning the entire inspection process
has never been easier with PLANNER.

Save time and digitalized your data to automate your inspection specification with other applications or other organizations.

Increase your productivity using PMI following the standards to and avoid human errors.

Facilitate and consolidate the preparation phase of the inspection process.

Ease of use for all operators with clear interface.

TECHNICAL FEATURES

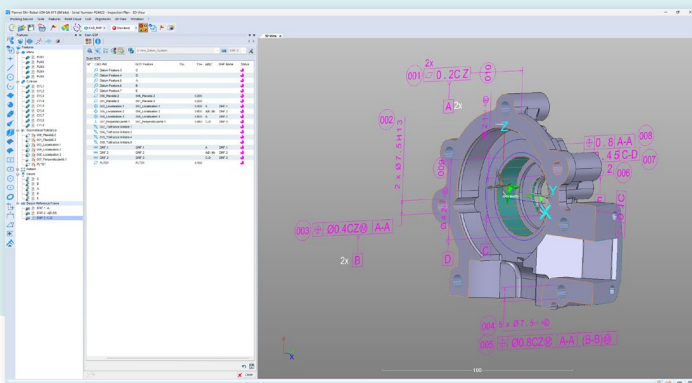

Import any CAD file, any data such as CATIA, SOLIDWORKS, NX, Creo, STEP, IGES, etc.

This keeps your workflow fully open and compatible.

Prepare Inspection Feature Plan :

- **From feature definition**
Ideal for building plans with clear geometric intent.
- **From PMI and ballooning**
Perfect for fast and annotationdriven setup.

Explore or edit your own PMI and ballooning to adapt the data exactly to your needs.

Create inspection alignment to ensure consistent part positioning every time.

Prepare views with stickers:

This makes your inspection plan instantly understandable.

Prepare report 100% customized to deliver exactly the output your team or customer expects.

Prepare your export data:

This ensures smooth downstream compatibility.

Fusion CAD and inspection plan to QIF format:

This brings full interoperability to your digital workflow.
